Computers in Industry 19 (1992) 359–360
Elsevier

Contents Volume 19

Volume 19, Nr. 1, April 1992

ATPMS '92

1 A prototype system for short-term supply planning
B. Wall, P. Higgins, J. Browne and G. Lyons
21 Using artificial intelligence technologies in production management
J. Hynynen
37 Integration and manufacturing strategy
J.O. Riis
51 Economic aspects in production management
E. Eloranta and J. Nikkola
65 Human aspects in production management
B.E. Hirsch, B. Hamacher and K.-D. Thoben
79 Production management systems for one-of-a-kind production
J.C. Wortmann
89 Concepts, models and methods for the design of production management systems
G. Doumeingts, D. Chen and F. Marcotte
113 Computer-aided production management in China
R. Gan and J. Zhang
119 The role of computer-aided production management in CIM systems
H. Zhou
127 An expert simulation system for the master production schedule
Z. Li, H. Tang and H. Tu
135 Production scheduling in preemptive and simultaneous processing
Z. Hao
143 Group technology and its relation with CIM
X. Wu, H. Huang and G. Yang
151 A hybrid system of manufacturing resource planning and just-in-time manufacturing
M. Jiang and S. Li
157 Relation between production management and computer-aided design
C. Xiao

Volume 19, Nr. 2, May 1992

Modeling in Computer Graphics

162 Foreword
163 Editorial
165 A NURBS approach to cyclides
X. Zhou and W. Straßer
175 A uniform approach to represent features in different application contexts
B. Falcidieno, F. Giannini, C. Porzia and M. Spagnuolo
185 Three-dimensional garment design and animation—A new design tool for the garment industry
Y. Yang, N. Magnenat Thalmann and D. Thalmann
201 Efficient display of quadric CSG models
R. van Kleij

Elsevier Science Publishers B.V.

213 Interactive modeling in high-performance scientific visualization—The VIS-A-VIS project
P. Astheimer, J.L. Encarnação, W. Felger, M. Frühauf, M. Göbel and K. Karlsson
227 Interactive data input system for the 3-D finite element method with superior man–machine interfaces
H. Yamashita, Y. Tanizume and E. Nakamae
239 Geometrical constraint solving based on the extended Boltzmann machine
N. Kin, Y. Takai and T.L. Kunii
Events
251 Calendar

Volume 19, Nr. 3, June 1992

State-of-the-Art
257 Illustration of object-oriented databases for the structure of a bill of materials
Y. Chung and G.W. Fischer
Management Information Systems
271 A computer-assisted system for productivity management
S.-Y. Liu and J.-G. Chen
Knowledge Engineering
281 An expert system for integrated circuit board inspection
C.A. Ntuen
Applications
291 Cell placement of almost regular structures
J. Cloutier and P. Szolgay
297 Estimation of average freezing and thawing temperature versus time with infinite slab correlations
A.C. Rubiolo de Reinick
307 Determination of electrical potential distribution in grounding systems
S. Tchouaté, E. Tonye and A. Foudjet
317 Discrete event sequencing as a Traveling Salesman Problem
E.D. Kosiba, J.R. Wright and A.E. Cobbs
329 Curved surface machining through circular arc interpolation
G.W. Vickers and C. Bradley
